AAKASH SHARMA

Engineering Lead | Python & Django | Team Leadership & Delivery

Gurugram, India | er.aakashtrikha@gmail.com | +91 98768 30251 | github.com/Aakash017 | linkedin.com/in/aakash-sharma-121ab5165

SUMMARY

Engineering leader with 8+ years of experience and a track record of leading teams of up to 15 engineers across the energy and insurance domains. Currently serve as team lead for a 15-person team at Wood Mackenzie, owning requirement gathering, delivery planning, and mentorship. Rescued a production platform by resolving all major issues in 50 days against a 90-day mandate. Hands-on Python/Django engineer whose teams cut AWS costs by 45%, downtime by 70%, and delivered AI/LLM solutions with RAG and agent-based workflows. Currently scaling an AI-enabled engineering team and delivery practice.

WORK EXPERIENCE

Senior Software Engineer (Team Lead — 15 Engineers) — **Wood Mackenzie** Gurugram, India | 11/2023 – Present

- Serve as team lead for a cross-functional team of 15 (12 developers, 3 QA), owning requirement gathering, task allocation, and delivery commitments across 20 repositories/services; track delivery and reliability through DORA-style metrics (deployment frequency, MTTR) and uptime SLOs to ensure on-time, stable releases.
- Mentor 12 developers on technical growth through code reviews, design discussions, performance feedback, and day-to-day coaching; support hiring through technical interviews.
- Drove a 45% reduction in AWS infrastructure costs by prioritizing and leading a Python optimization initiative and right-sizing EC2, Lambda, and RDS usage.
- Directed the design of microservices in Python using Django and FastAPI (async I/O with asyncio, Pydantic validation) that boosted system scalability by 40% and enabled integration across diverse market environments.
- Delivered AI-powered solutions (LLMs via OpenAI, Claude, AWS Bedrock, and Gemini; RAG pipelines with vector databases; agent-based workflows with LangChain, LangGraph, A2A), automating previously manual analysis workflows.
- Achieved a 99% accuracy rate in market data processing by overseeing development of a data quality checker in Python/Django.

Software Engineer (Team Lead — 6 Engineers) — **PasarPolis India Pvt Ltd** Gurugram, India | 11/2021 – 11/2023

- Served as team lead for 6 engineers, owning task allocation, code reviews, and delivery across web-based insurance solutions.
- Resolved 100% of major production issues in 50 days against a 90-day mandate by leading a 3-engineer taskforce through triage, prioritization, and remediation; recognized with the Employee of the Month award.
- Defined and led the technical architecture strategy for Python/Django web-based solutions, establishing design standards adopted by the engineering team.
- Raised code quality and maintainability scores by 51%, measured via code-review metrics, by instituting rigorous Python review practices and pytest-based testing standards across the team.
- Reduced system downtime by 70% (raising platform availability toward a 99.9% uptime SLO) by directing the design of robust, scalable, and secure Django microservices.

Software Engineer (Technical Lead — 11 Engineers) — **RenewBuy** Gurugram, India | 12/2019 – 06/2021

- Served as technical lead for a cross-functional team of 11 (8 developers, 3 QA), owning delivery of insurance platform features from design through release.
- Led the design and development of an operations panel in Python/Django, cutting manual data entry by 50% and saving 20+ hours per week.
- Spearheaded the system design of a video inspection rule engine, increasing fraud claim detection accuracy by 84%.
- Engineered a policy renewal journey in Python/Django that contributed to 60% business growth.

Python Developer — **Bains Innovation Labs** Chandigarh, India | 06/2018 – 12/2019

- Developed Django REST APIs for Autolife and Carsandjobs enabling third-party integrations, and increased completed transactions by 30% by integrating PayPal, Authorize.net, and Moneris payment gateways.

SKILLS

Leadership: Team Management, Mentoring & Coaching, Hiring & Technical Interviewing, Performance Feedback, Delivery Planning, Capacity & Roadmap Planning, Delivery Metrics (DORA, SLOs), Requirement Gathering, Stakeholder Management, Agile/Scrum

Languages & Frameworks: Python, Django, Flask, FastAPI, asyncio, Pydantic, RESTful APIs, SQL

AI & LLM: OpenAI, Anthropic Claude, AWS Bedrock, Gemini, RAG, Vector Databases (pgvector, FAISS), Embeddings, LangChain, LangGraph, A2A (Agent-to-Agent), AI Agents

Data & Messaging: Apache Airflow, Celery, RabbitMQ, MySQL, PostgreSQL, Redis, MongoDB, DynamoDB, ETL Pipelines

Cloud & DevOps: AWS (EC2, S3, Lambda, SQS/SNS, RDS, CloudWatch), GCP, Docker, Kubernetes, Terraform (IaC), CI/CD, Linux, Git, GitLab

Testing & Observability: pytest, unittest, Integration Testing, CloudWatch, Grafana, Prometheus

Security: OAuth2, JWT, REST API Security

Practices: Microservices, Event-Driven Architecture, System Design, API Design, Code Review, Performance Optimization

EDUCATION

FCET Ferozepur — **Bachelor of Engineering and Technology, Computer Science and Engineering**
Ferozepur, India | 07/2011 – 08/2015

CERTIFICATIONS & AWARDS

- Apache Airflow using GCP
- Employee of the Month, PasarPolis (04/2022 – 05/2022)

Languages: English, Hindi
